## SHAVING SYSTEM

Mingchih M. Tseng

### ABSTRACT OF THE INVENTION

5

10

*A*  
~~In accordance with one aspect of the invention, there is provided a shaving unit that~~  
comprises at least one blade and a skin engaging member that has a surface for engaging the  
user's skin adjacent the blade edge. The shaving unit may be of a disposable cartridge type  
adapted for coupling to and uncoupling from a razor handle or may be integral with a handle  
so that the complete razor is discarded as a unit when the blade or blades become dulled.  
15 The blade edge (or edges) cooperate with skin engaging surfaces to define <sup>a shaving</sup> ~~having~~ geometry.  
The skin engaging member is comprised of an elongated sheath <sup>also</sup> made of a mixture of water  
insoluble matrix material and an effective amount of shaving aid material and a rigid core <sup>with</sup>  
material extending axially through out said sheath. The axial position of the core need not be  
through the central axis.
